2W INSURANCE · RENEWAL PERFORMANCE REVIEW

What's holding back our renewals, and how we fix it

Policies due January to September 2026 · what happened, why, and what to do next

1.02M
leads uploaded

48.5%
of leads called at least once

13,072
policies renewed (2.65% of called)

₹19.7M
premium (₹1.97 crore)

EXECUTIVE SUMMARY

Customers do renew. We reach most of them too late, only once, or not at all.

What we saw

Half of our 1.02M leads were never called (51.5%).

Leads tripled from January to September; renewals only doubled.

2.65% of called leads renewed. OEM brought 81% of all renewals.

Why it happened

39% of first calls happen on or after the due date, when about 1% renew.

Aug–Sep leads were 2.8× higher and arrived late; callers grew 24%.

127K unreachable customers never got a second call; 12.8K “Confirmed” customers never paid.

What we do

Call by due date, at least 15 days ahead.

Retry the unreachable; send a same-day payment link to every “Confirmed”.

Fix Agency bulk links and HOM quoting; staff the Aug–Sep peak.

The upside: each fix is worth roughly 1.5K–3.2K extra renewals (₹2.3M–₹4.8M), against 13,072 renewals today.

WHERE WE STAND · THE FUNNEL

Out of 1.02M leads, 13,072 renewed. The biggest leak is the very first step.

522,897

leads were never called: 51.5% of everything uploaded

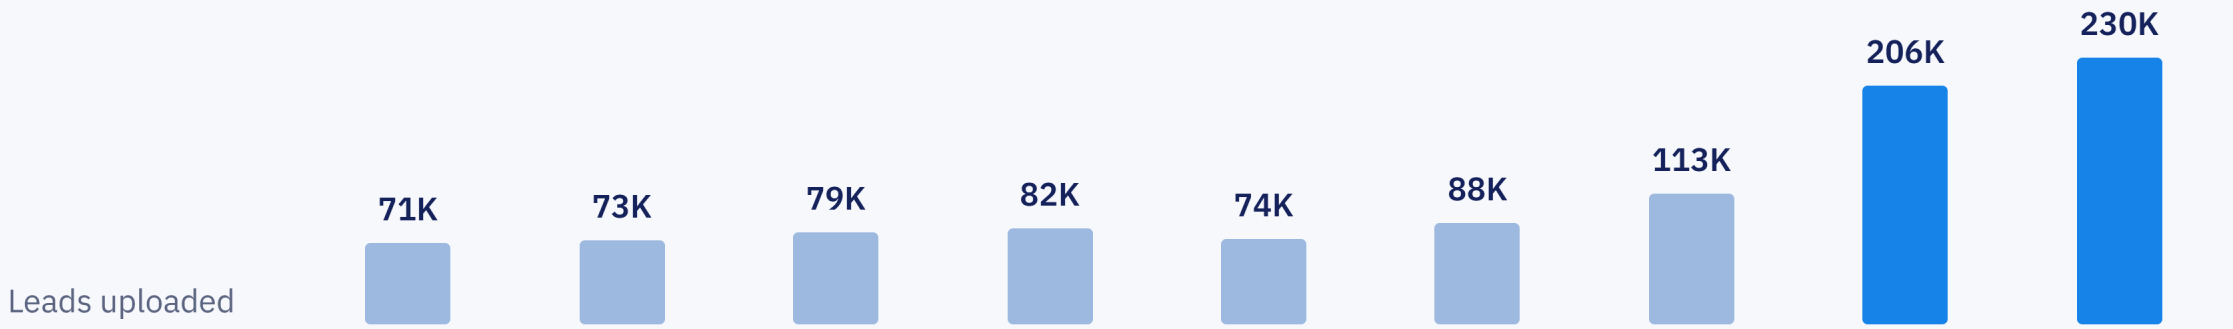

14.1%

of payment links became a renewal: 51% in January, 7% in September

Bars are to scale. Called = at least one call attempt · 3 / 14

WHERE WE STAND · MONTH BY MONTH

Leads tripled since January; renewals only doubled

Due month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep
Attempt %	54.7%	58.1%	53.8%	51.8%	59.1%	58.9%	55.9%	37.5%	39.4%
Conversion %	3.2%	2.6%	2.0%	1.6%	2.0%	2.5%	3.3%	3.0%	2.8%
Renewed	1,234	1,091	861	693	888	1,297	2,117	2,343	2,548

Mar–Apr dip: conversion fell to 1.6%. OEM sent fewer payment links (5.3% of calls vs 7.1% in Jan) and HOM made 11–13K calls a month that produced almost no renewals.

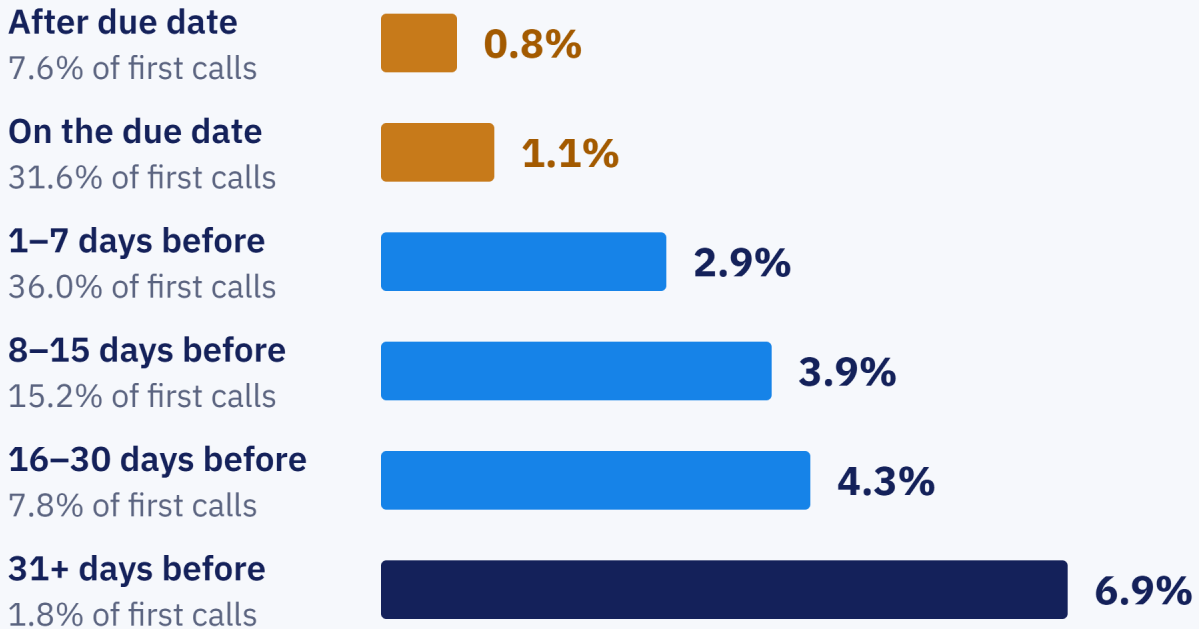

Aug–Sep drop: the attempt rate fell to 37.5% and 39.4%. Leads were 2.8× higher and half of August's arrived within a week of the due date, or after it.

Conversion % = Renewed ÷ Attempted (as on the dashboard) · Orange = months of concern · 4 / 14

WHY #1 · WE CALL TOO LATE

39% of first calls happen on or after the due date, when almost nobody renews

Renewal rate by when the first call was made

32 days

median wait from lead upload to first call. Leads arrive about 42 days before due.

1.0% vs 4.4%

OEM renewal leads only: first call on/after due vs 8+ days before. Timing, not mix.

86% · 69% · 79%

of HOM, Agency and rollover first calls are on or after due (OEM: 17%).

Renewal rate = renewals among called leads ÷ called leads, grouped by first-call date vs policy due date · 5 / 14

WHY #2 · PEAK MONTHS OUTGREW THE TEAM

In Aug–Sep, leads grew 2.8× and arrived late, but callers grew only 24%

2.8×

more leads a month: 78K (Feb–Apr average) to 218K (Aug–Sep)

+24%

more active callers: 111 to 138

+52%

more new leads per caller: 385 to 587 a month (September)

49%

of August leads arrived within 7 days of the due date, or after it

THE RESULT

The share of leads we called fell from 52–59% (Jan–Jul) to **37.5% in August** and **39.4% in September**.

Across the year, 116.6K leads (11.5%) reached us on or after their due date. Only 1.1% of the ones we called renewed.

Active callers = logins that made a first call that month · Lead arrival = upload date vs policy due date · 6 / 14

WHY #3 · WEAK FOLLOW-THROUGH

Unreachable customers get one try, and “Confirmed” customers aren’t closed

Customers we couldn’t reach

127,382

didn’t pick up the first call (ringing, busy, switched off) and were never called again

0.35%
renewed when called only once

3.1%
renewed when called again; 44% were reached

57% of all called leads got exactly one call.

Customers who said yes

12,810

said “Confirmed” on their last call but never renewed

22%
of 16,388 “Confirmed” customers renewed

6.4%
of 31,117 “Book appointment” customers renewed

These are warm leads. They need a payment link the same day and a call back within 24 hours.

Unreachable = first call Ringing / Busy / Switched off · Confirmed, Book appointment = last call outcome · 7 / 14

WHERE IT BREAKS · CHANNELS

Each channel breaks at a different step of the funnel

OEM

Working: protect and scale

466K leads · **66.6%** called
3.43% of called leads renew
35.5% of payment links renew

81% of all renewals. Conversion rose from 2.4% (Apr) to 4.3% (Sep) as payment links went from 5.3% to 19.3% of calls.

Agency

Breaks at: payment-link quality

326K leads · **26.5%** called
70% of called leads get a link
only **2.8%** of links renew

One agency code sent 52K of Agency's 61K links (2.7% renew). Conversion fell from 5.4% (May) to 1.4% (Sep) as bulk links grew.

HOM

Breaks at: quoting

224K leads · **42.8%** called
only **2.5%** of called get a quote
0.74% of called leads renew

When HOM does send a link, 39% renew. Its 101K renewal-campaign leads: only 8% called, 9 renewals.

Zones follow channels: East is 83% HOM (1.0% renewal rate). West is 66% Agency, and 66% of its leads were never called.

WHERE IT BREAKS · ZONES, MANAGERS AND DEALERS

East converts at 1%, and West leaves two-thirds of its leads uncalled

Zone	Leads	Called	Renew rate	Late first call	Never called
East	208K	58.5%	1.0%	68.5%	86K
North	90K	58.7%	2.8%	14.9%	37K
South	230K	66.7%	3.8%	15.2%	77K
West	487K	33.7%	2.8%	47.8%	322K

Callers: the top quarter of callers renew 6.5% of the leads they call; the bottom quarter, 0.2%. Part of this is channel mix, but the gap is too big to be only that.

235K

uncalled leads in Ajay Banerjee's region: 45% of everything not called

1.3%

of Shreya Sharma's 31.7K leads were called, with zero renewals

147 of 306

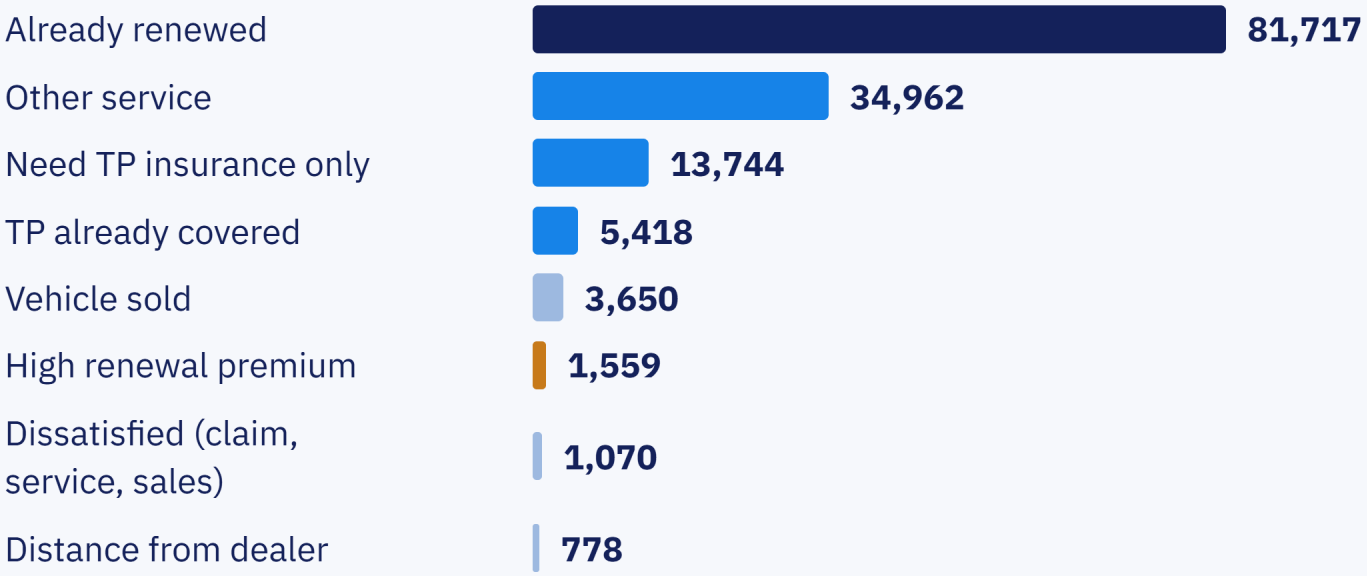

dealers have zero renewals; they hold 193K leads (19%)

Late first call = on or after the due date · Callers = 73 logins with 2,000+ called leads · 9 / 14

WHY CUSTOMERS SAY NO

“Already renewed” is the top reason customers give. Price is rarely the problem.

Called leads by reason given, Jan–Sep

19.2K

customers want, or already have, third-party-only cover. Only 2K of our leads are SATP. A TP-only offer could win some of them.

TO CONFIRM

The is_renewed flag shows 78.8K leads renewed, against 12.9K renewals through us. If it means “renewed anywhere”, about 66K customers renewed through another route.

Reason = the secondary call outcome recorded by the caller (tertiary disposition) · 10 / 14

WHAT'S WORKING

Where we already do well, and what to copy

81%

of renewals come from the OEM renewal campaign: 68% of its leads called, 36% of its links renew.

2.4% → 4.3%

OEM conversion from April to September, as payment links rose from 5.3% to 19.3% of calls.

3.8%

South's renewal rate, the best zone: 67% of leads called and only 15% of first calls late.

3.8%

renewal rate in Vikram Naidu's and Nandini Desai's regions, the best zone managers.

3.9–6.9%

renewal rate when the first call is made 8 or more days before the due date.

6.5%

renewal rate of the top quarter of callers. Their scripts and habits are the playbook.

Renewal rate = Renewed ÷ Called, Jan–Sep 2026 · 11 / 14

THE SIZE OF THE PRIZE

Four fixes, each worth roughly 1.5K–3.2K extra renewals

Fix	Today	What we assume	Extra renewals	Extra premium
1. Call before the due date	193K leads first called on or after due; 1.1% renew	They renew at the 1–7-day rate of their own channel and campaign	+1.8K	+₹2.8M
2. Retry unreachable customers	127K called once and never reached; 0.35% renew	A retry reaches half the rate of retried leads (1.6% vs 3.1%)	+1.5K	+₹2.3M
3. Close “Confirmed” customers	12.8K said “Confirmed” but didn’t pay	We recover 1 in 4 with same-day links and call-backs	+3.2K	+₹4.8M
4. Staff the Aug–Sep peak	37.5% and 39.4% of leads called	Called share back to 55%, at the Aug–Sep renewal rate (2.9%)	+2.1K	+₹3.2M

Today: 13,072 renewals and ₹19.7M premium. The estimates overlap, so they should not be added together. Premium uses ₹1,504 per renewal.

WHAT WE DO NEXT

Action plan for the next 90 days

First 30 days

Sort call queues by due date; first call 15+ days before due
Operations leads

Retry rule: 3 attempts over 3 days for every unreachable lead
Team leads

Same-day payment link and 24-hour call-back for “Confirmed” leads
Callers

Audit the agency code behind 52K low-converting links
Agency channel head

30–60 days

Files uploaded 30+ days before due; flag late files to dealers
MIS and dealer operations

Aug–Sep peak plan: extra callers, WhatsApp-first for rollover
Operations head

HOM: work the 101K renewal leads; quote and link every interested call
HOM manager

60–90 days

Coach bottom-quarter callers with top-quarter scripts
Training

Launch a TP-only option for the 19K customers who ask for it
Product

Clean up call outcomes; confirm what is_renewed means
MIS

HOW WE TRACK IT

Six numbers to review every week

Measure	Today	Proposed target
First calls made 8+ days before the due date	24.7%	50%
First calls made on or after the due date	39.2%	Under 15% (OEM: 16.5%)
Leads called at least once (Attempt %)	48.5%	60%
Unreachable leads given 3 or more attempts	16.5%	80%
“Confirmed” customers who renew	22%	40%
Agency payment links that renew	2.8%	10%

DATA FIXES NEEDED FOR RELIABLE TRACKING

4,536 renewals still show “Renewal not required” as the last call outcome. 71K reason entries hold dates instead of reasons. June has no reasons recorded at all. Confirm what is_renewed means.
